

# A Supportive, Not Therapeutic, Perspective

This hydration-centered framework does not position Magnetically Structured Water as a sexual treatment or stimulant. Rather, it is presented as a **potential supportive approach** that may help maintain physiological conditions associated with comfort, responsiveness, and vitality.

---

## Evidence & Responsible Use

No controlled human clinical trials have evaluated MSW for sexual function outcomes. The framework presented is based on established physiology and observed hydration-related effects in other biological contexts.

❏ **Important:** Individuals experiencing persistent sexual concerns should seek appropriate medical evaluation.
